AGENDA and PROGRAM

Participants:

- D. José Luis Perales: Alcalde del Ayuntamiento de Perales del Puerto. Vicepresidente de la Mancomunidad de Municipios de Sierra de Gata
- D. Ignacio Márquez Acedo: Gerente de la Mancomunidad de Municipios de Sierra de Gata.
- Dña. Martina Rodríguez Piñeiro: Ingeniero Técnico Forestal. Monitora de Recursos Forestales del Taller de Empleo “El Olivo”.

Workshop on Project Altener ASTWOOD at Sierra de Gata 2008, October, 28th

10:00-13:00 h: Presentation by the three speakers from the experiences and results to be obtained over the two-year project.

10:00-10:15 h: Welcome to the attendees from D. José Luis Perales

10:15-10:45 h: 1st session: D. Ignacio Marquez Acedo: manager of the Commonwealth

10:45-12:15h: 2nd session: Ms. Martina Rodriguez Pineiro.

12:15-13:30h: 3rd session: D. Ignacio Marquez Acedo.

13:30-14:00h: Visit of attendees to the demonstration unit

14:00h: Adjourn

MAIN SUBJECTS DEVELOPED

In the first intervention of the session, Ignacio Marquez Acedo, manager of the City Union, presented the companies and public entities participating in the study and its role, as well as the project development.

In the second intervention, Martina Rodriguez Piñeiro described the technical performed reports dealing with logistics, equipment and availability of biomass in the Sierra de Gata.

In the third and last intervention Ignacio Marquez Acedo introduced and explained the details of the socio-economic reports, the website where you can follow the project from the first minute, the software tool that has been developed, as well as the demonstration unit at Sierra de Gata.

The workshop finished with a visit of attendees to the demonstration unit.

FEEDBACKS AND CONCLUSIONS

Forest owners and farmers realise about the high biomass potential in the area. New initiatives for the valorisation of residues and biomass were highlighted.

The biomass technologies, cleaning process, and forest management as well as the know-how transferred from Austria were very appreciated by municipalities and forest technicians. Opportunities and possible future projects were discussed.

As main conclusion, the high potential in biomass and the knowledge transferred, encouraged the politicians and stakeholders to invest in biomass. In general all agreed to consider the biomass as priority in the future.
